Rainbow Shade Fabric Provides:

The Australian Standard in its recent review has adopted the UVE (Ultra Violet Effectiveness) ranking scale. This clearly shows Schools, Councils and Early Learning Centres the level of sun protection offered by a shade fabric. UVE measures the sun protection effectiveness and ranks products into effective, very effective and most effective sun protection categories.

This Rainbow Shade UVE reference guide shows three of Australia's most popular shade fabric brands, grouped into their Ultra Violet Effectiveness ranking.

The Australian Standard has ranked 23 Rainbow Shade fabric colours as having the Most Effective UVE ranking. With up to 99% UV Radiation block, Rainbow Shade fabrics provide the ultimate solar protection.

By using Rainbow Shade fabric, you are assured that you have the sun protection you need to create safer outdoor play environments.

HIGH UV-R PROTECTION
(UP TO 99%)

GREAT REDUCTION IN
HEAT & GLARE

FIRE RATED FABRIC
